

HISTORY OF DISCOVERY – U RESEARCH

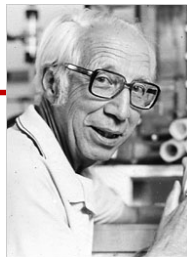

First UU Patent
Wayne Brown

1965

Invention Disclosure
U-0001

1974

Wearable Artificial Kidney
Willem Kolf
(unveiled in 1979)

1976

Artificial Heart
Robert Jarvik (first heart
implanted in 1982)

**Actiq (known as
Fentanyl Lollipops)**
Ted Stanley

1984

BRCA1 Gene
Mark Skolnick & Lisa
Cannon-Albright
(successfully cloned in
1994)

1992

1989

PCR - Rapid Diagnostics
Carl Wittwer

VISION STATEMENT

OUR VISION

To cultivate a national and international leading research community through **excellence, innovation, and interdisciplinary research** at the University of Utah.”
